INCITING INCIDENT

Simply Survival

Stealing was a matter of survival for you and not what defined you – at least in your mind. But when your thieving actions lead to innocent folk being harmed, you knew you could be better. You turned your back on your old life, though your old skills come in handy.

COMPLICATION

Brood Smash!

DESCRIPTION

Your stoic philosophy works pretty well for silently enduring *other* people's pain, but when you take a punch to the face, you tend to get agitated. While you are bleeding or winded, your abilities that cost discipline cost one less discipline (minimum 1) if they deal damage, and they cost one more discipline if they don't deal damage.

ANCESTRY TRAITS AND PERKS

Criminal Contacts

You have access to a network of criminal contacts. As a respite activity while you take a respite in a settlement, you can ask a question of your contacts by making a Presence test. On a tier 2 outcome, you learn one piece of information that would be common among criminals—the secret entrances into a building, the location of a local criminal in hiding, the name of a local thieves' guild leader, and so forth. On a tier 3 outcome, you can instead gain knowledge that would be uncommon among criminals as long as such information exists—the location of a local treasure cache, the location of a murder weapon used in a noble's assassination, the name of an NPC secretly bankrolling a local assassin's guild, and so forth.

Doomsight

Working with your Director, you can predetermine an encounter in which you will die. When that encounter begins, you become doomed. While doomed, you automatically obtain a tier 3 outcome on tests and ability rolls, and you don't die no matter how low your Stamina falls. You then die immediately at the end of the encounter, and can't be returned to life by any means.

If you don't predetermine your death encounter, you can choose to become doomed while you are dying with the Director's approval (no action required). Doing so should be reserved for encounters in which you are dying as a result of suitable heroism, such as making a last stand against a boss or saving civilians, or when the consequences of your actions have finally caught up to you — not because you're playing a one-shot and have nothing to lose, Hacaarl.

Additionally, when your Stamina reaches the negative of your winded value and you are not doomed, you turn to rubble instead of experiencing death. You are unaware of your surroundings in this state, and you can't regain Stamina or have this effect undone in any way. After 12 hours, you regain Stamina equal to your Recovery value.

- **Inertial Anchor:** Any target who starts their turn in the area can't shift.
- **Synaptic Break:** Whenever you or any ally uses an ability against a target that has a potency effect, the potency is increased by 1.

TRIGGERED ACTION

REORDER

Free Triggered Action

Self

Self

Trigger: You start your turn.

Effect:

End one effect on you that is ended by a saving throw or that ends at the end of your turn. Alternatively, you can grant this benefit to one creature in the area of your Null Field ability.

SNEAKING

While you are hidden from another creature and not in combat, you can attempt to sneak—avoiding the senses of other creatures as you move around them in the open—to remain hidden. While sneaking, your speed is halved. To sneak, you make an Agility test using the Sneak skill with a difficulty set by the Director. If you succeed, you remain hidden during your movement. This test can use another characteristic at the Director's discretion, such as using Presence to blend in with a crowd on a packed city street.

MOVE ACTIONS

Any creature can take the following move actions:

- **Advance:** Move a number of squares up to your speed. You can break up this movement with your maneuver and action however you wish.
- **Disengage:** Shift 1 square.
- **Ride:** Cause a mount you are riding to take the Advance move action. A mount can only benefit from this once per round.

HIGH GROUND

Whenever a creature uses an ability to target a creature or object while standing on the ground and occupying a space that is fully above the target's space, they gain an edge on the power roll against that target. To be fully above a target, the bottom of a creature's space must be higher than or bordering on the top of the target's space.

A creature can gain this benefit while climbing only if they have "climb" in their speed entry or can automatically climb at full speed while moving.

TRIGGERED ACTION

INERTIAL SHIELD

You intuit the course of an incoming attack, reducing its effects.

Psionic **Triggered Action**

🗡️ Self ⌚ Self

NOTES

CRITICAL HIT

Whenever you make an ability roll as a main action and the roll is a natural 19 or natural 20 — a total of 19 or 20 before adding your characteristic score or other modifiers — you score a critical hit. A critical hit allows you to immediately take an additional main action after resolving the power roll, whether or not it’s your turn and even if you are dazed (see Conditions below).

You can’t score a critical hit with an ability roll made as a maneuver or any other action type, but you can score a critical hit with a main action you use off your turn. For example, an opportunity attack made as a triggered action or a signature ability used as a free triggered action with the assistance of the tactician’s Strike Now ability can be critical hits.

OTHER FEATURES & REFERENCE

CRYOKINETIC

Cryokinetic Mastery

As your discipline grows, you strengthen the psionic power suffusing you, granting benefits from the Cryokinetic Mastery table. Benefits are cumulative except where an improved benefit replaces a lesser benefit.

Discipline	Benefit
2	Whenever you use the Knockback maneuver, you can target one additional creature. Additionally, whenever you deal untyped damage with a psionic ability, you can change it to cold damage instead.
4	The first time on a turn that you grab a creature or an enemy moves 1 or more squares in the area of your Null Field ability, you gain 1 surge.
6	You gain an edge on the Grab and Knockback maneuvers.
8 (4th level)	The first time on a turn that you grab a creature or an enemy moves 1 or more squares in the area of your Null Field ability, you gain 2 surges.
10 (7th level)	You have a double edge on the Grab and Knockback maneuvers.
12 (10th level)	Whenever you force move a target, the forced movement distance gains a bonus equal to your Intuition score. Additionally, whenever you use a heroic ability, you gain 10 temporary Stamina.

JUMPING

Whenever an effect allows you to move (including using the Advance move action), you can automatically long jump a number of squares up to your Might or Agility score (your choice; minimum 1 square) as part of that movement. The height of your jump is automatically 1 square as part of that movement.

If you want to jump even longer or higher than your baseline jump allows, make a Might or Agility test:

Power Roll + Might or Agility:

Roll	Effect
≤11	You don’t jump any farther than your baseline jump allows.
12-16	You jump 1 square longer and higher than your baseline jump allows.
17+	You jump 2 squares longer and higher than your baselinejump allows.

You can’t jump farther or higher than the distance of the effect that allows you to move. You can’t jump out of difficult terrain or damaging terrain.

11

The first time each game session that you describe your philosophy to an NPC, you gain a hero token. When you make a test to intimidate someone, your absolute certainty gives the roll an extra edge. You can use intimidation during a negotiation.
